

Liquid Chalk = bye bye fine dust?

The high fine dust pollution in climbing gyms has been a problem for a long time. There doesn't exist a toxicological evaluation for magnesium carbonate, however, some studies show that a ban of chalk and the use of liquid chalk decreases the fine dust pollution (PM10) in climbing gyms considerably.

Therefore, besides making maximal use of ventilation possibilities, also liquid chalk can help in this respect.

CHALKER Liquid Chalk

12 x 100 ml bottle

Product Code: RT10LC12

Cost/bottle: 3,25€

RRP/bottle: 6,50€
